## EDUCATION

**Texas Tech University** — Lubbock, TX
*Pursuing a B.S. in Computer Science* — Aug. 2024 - May 2028

**Cristo Rey Jesuit College Prep of Houston** — Houston, TX
*Distinguished High School Diploma* — Aug. 2020 - May 2024

## EXPERIENCE

**Information Technology Intern** — Jan. 2022 - May 2023
*Cristo Rey Jesuit Corporate Work Study* — Houston, TX

- Configured and maintained 50+ computers, printers, and networking equipment
- Assisted in deployment of school infrastructure supporting 650+ users
- Gained experience troubleshooting hardware, software, and operational IT issues

**Catholic Charities Intern Assistant** — Aug. 2023 - Aug. 2024
*Cristo Rey Jesuit Corporate Work Study* — Houston, TX

- Organized and managed large sets of administrative records using Microsoft Office tools
- Developed strong organizational, communication, and adaptability skills in a professional environment

## PROJECTS

**NASA L'SPACE Mission Concept Academy | *Command & Data Handling (CDH)*** — May 2026 - Aug. 2026

- Designed the Command & Data Handling subsystem concept for a 14-day lunar rover mission targeting permanently shadowed regions near the lunar south pole
- Performed trade studies for onboard computing, data storage, internal communications, telemetry, and relay communications, selecting a GR740-based computing architecture
- Developed subsystem requirements, interfaces, technical documentation, and hardware layouts for integration into the team's Preliminary Design Review (PDR)

**Roblox Development Commissions | *Roblox Studio, Blender, Maya*** — June 2018 - Present

- Collaborated with independent developers on commissioned Roblox projects, including map and environment design work associated with Kodansha-funded experiences
- Created and integrated 3D assets, terrain, and environment layouts for multiplayer game experiences
- Optimized assets and scene composition for real-time performance within Roblox Studio
- Worked across modeling, environment design, asset importing, and iterative in-engine testing workflows
- Managed client requirements, revisions, and delivery timelines across 20+ commissioned projects

**OpenGL Rendering Sandbox | *C++, OpenGL, GLFW, GLAD*** — 2026 - Present

- Developing a graphics programming sandbox in C++ using modern OpenGL
- Implemented shader compilation, linking, and validation pipelines with runtime error handling and debugging
- Built rendering workflows using vertex array objects, vertex buffers, and programmable GLSL shaders
- Exploring foundational graphics concepts including GPU pipelines, coordinate systems, rendering architecture, and real-time rendering techniques

## TECHNICAL SKILLS

**Languages:** C++, HTML, CSS
**Graphics & Game Development:** OpenGL, GLFW, GLAD, Roblox Studio, Blender, Maya
**Developer Tools:** Git, VS Code, Visual Studio
**Concepts:** Graphics Programming, Shader Pipelines, Real-Time Rendering, 3D Asset Integration
